

A Minimal Document Template

v0.2.1

Gleb Ebert

April 15, 2024

Introduction

This template gets rid of much of the white space that you find in most title blocks, reduces page margins and uses a smaller default font size of 10pt. Thus more text fits on one page. It also features a header that includes identifying information of the document.

Installation

Creating a New Project

You can use this Minimal Document template to start a new project by running the following command in the terminal:

```
quarto use template gl-eb/minimal-doc
```

Using the Template in an Existing Project

You can install this Minimal Document template into an existing project by running the following command in the terminal:

```
quarto add gl-eb/minimal-doc
```
